

# **HOW TO GROW A CORPORATE GARDEN**

## **Networking event**

***Community Garden Partnership (a program of Goodwill NCW) in collaboration with Access, SCA, Thrivent Garden Partners and company gardeners in the Fox Cities***

***Hosted the first annual***

**On February 11, 2010**

**At SCA Tissue, 1451 McMahon Drive, Neenah**

The event was developed as an informational presentation and networking opportunity to learn more about the benefits of corporate and community gardens, how to start and maintain a garden at a company site, various options for the Garden, and success stories of current corporate gardeners.

Participants agreed that the opportunities to explore and build on this first gathering presented everyone an exciting means to impact the health of their company, employees and surrounding community. In the words of one attendee, "I had no idea that our garden could have such an impact."
